

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph starting at page 1, at the line which is labeled as line 22, with the following amended paragraph:

-- This object is fully obtained by the device for positioning a tubular label at a pre-established height from a bottle bottom in a labelling machine, subject of the present invention, which is characterised characterized for what is provided by the below-listed claims.—

Please replace the paragraph starting at page 3, at the line which is labeled as line 9, with the following amended paragraph:

-- Both devices 1 and 10 are fixtures that must be replaced depending on the height at which the label must be applied with respect to the bottle bottom; in particular, in the device 10, the pins 11 will have to be replaced for adjusting the bottle positioning height and the semi-circle racket bracket 12 depending on the bottle diameter.—
